

MICROSOFT DYNAMICS 365

BUSINESS CENTRAL

Your All-in-One Business Management Solution

Business Central: Modern, Intelligent and Adaptable

Like a supply chain, when all the pieces of a business fit and work together, you gain more efficient processes, maximized profitability and happy customers. But keeping all facets of your business in sync seems about as easy as ensuring no piece of a supply chain ever goes wrong.

That's why Business Central is so crucial to organizations that want to make faster, smarter decisions, gain flexibility and be able to adapt as their needs change. By connecting people and processes in efficient ways, Business Central saves you time, allows your employees to focus on core responsibilities and increases their productivity.

An End-to-End View of Your Business Anywhere, Anytime

Business Central not only integrates with Office 365 – including Outlook and Excel – but also offers the same functionality on mobile devices as on a desktop, meaning you can run your business from any platform, anywhere.

Plus, its cloud-based technology means all your data is real-time and up to date.

MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

An all-in-one business management solution, Microsoft Dynamics 365 Business Central helps you:

Manage Your Financials

By connecting financial data across accounting, sales and other departments, you get a full view of your business, including comprehensive reporting. Streamline AR and AP, accelerate your financial close, and model data to improve your forecast accuracy.

Automate Your Supply Chain

Business Central uses historical data and its connection to your inventory levels and customer sales to predict when and what you need to replenish so that you can reduce both shortages and overstocking.

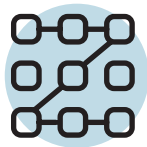

Improve Customer Service

By keeping track of your customer interactions, Business Central helps you understand when to upsell, cross-sell and renew throughout the customer sales cycle. Act faster on sales inquiries, service requests and other customer service needs to effectively assign resources and resolve cases.

Stay on Time and on Budget

Staying on track is easy with Business Central. You can track projects and invoicing, control budgets, manage resource levels and make more effective decisions with real-time insight on a project's status, profitability and resource-usage.

Optimize Your Operations

Business Central helps your organization generate production plans, create purchase orders, more efficiently fulfill orders, optimize capacity and resources, and best meet customer demands.

Let's get started.

As a cloud solution provider (CSP) in the Microsoft partner network, Wipfli has the knowledge, experience and capabilities to determine if Business Central is right for your business. Contact us to learn more about Business Central's features and benefits, or for a complimentary demonstration.
